

National Traffic Incident Management (TIM) Responder Training Program

Why this is important... Responders are being struck and killed at traffic incidents in the U.S. on average:

- **5** Firefighters each year
- **1** Law Enforcement Officer each month
- **1** Tow Truck Operator each week

The National TIM Responder Training Program was developed by responders for responders, and was designed to establish the foundation for and promote consistent training of all responders to achieve the three objectives of the TIM National Unified Goal (NUG):

- Responder Safety
- Safe, Quick Clearance
- Prompt, Reliable, Interoperable Communications

This 4-hour condensed version of the National TIM Responder Training Program is designed to equip responders with core competencies to address responder safety on highway incidents; safe, quick clearance practices for incidents and supports prompt, reliable, interoperable communications.

The impacts of this training program includes more effective multi-agency, coordinated, and planned incident response; improved responder safety; improved travel-time reliability by improved incident clearance times; and reduced congestion, collisions, and delays caused by secondary crashes.

The target audience for this course is all TIM disciplines, including: Public Works, Law Enforcement, Fire/Rescue, Emergency Medical Service, Towing and Recovery, Emergency Management, Communications, Media, and Highway/Transportation.

Three 4-Hour TIM classes

WEDNESDAY, JULY 27TH, 2016

Training Session 1:

FIREHOUSE #2

**Corner of Brougner Ave. and St.
Patrick Street, Tonopah NV**

8:00 am- 12:00 pm

TIM COALITION LUNCH MEETING

12:00 pm – 1:00 pm

Training Session 2:

1:00 pm – 5:00 pm

THURSDAY, JULY 28TH, 2016

Training Session 3:

8:00 am – 12:00 pm

This training is offered **free of charge**, however, agencies are responsible for all travel related expenses including lodging and meals

4 hours POST certified training credit

If you have any questions regarding this participation in this training, please contact:

Trooper Jim Stewart, NHP, JStewart@dps.state.nv.us, (775) 753-1253, OR Pat Gallagher, Parsons, Pat.Gallagher@parsons.com, (702) 789-2028.

National Traffic Incident Management (TIM) Responder Training Program

Traffic incidents, including crashes, disabled vehicles and debris on the road, create unsafe situations; put motorists, and responders' lives at risk; and account for approximately 25 percent of all traffic delays. For each minute that a freeway travel lane is blocked during peak use, an estimated 4 minutes of delay result after the incident is cleared. This estimate accounts for 4.2 billion hours per year in delays. Additionally, the U.S. Department of Transportation Strategic Plan Fiscal Year (FY) 2010 – FY2015 reports that Americans burn more than 2.8 billion gallons of gasoline every year while stuck in incident-related traffic.

In response to Congress' directive to improve the efficiency and safety of the U.S. highway system, The Federal Highway Administration (FHWA) is offering the first national, multi-disciplinary traffic incident management (TIM) process and training program. The unique training for first responders promotes a shared understanding of the requirements for safe, quick clearance at traffic incident scenes; prompt, reliable and open communications; and motorist and responder safeguards. Governors, transportation leaders and incident response agencies across the country can save lives, time and money by promoting the full-scale deployment of the innovative TIM training program.

The TIM training program focuses on a response effort that protects motorists and responders while minimizing the impact on traffic flow. TIM efforts include detecting, verifying and responding to incidents; clearing the incident scene; and restoring traffic flow.

Using a multiple-discipline perspective, first responders within States, regions and localities learn how to operate more efficiently and collectively. The training covers many topics including recommended TIM procedures and techniques. For example, first responders learn how the placement of response vehicles and traffic control devices can either aid or impede

responder and motorist safety, and can impact how quickly traffic flow can be restored.

Extensive research and testing have gone into the development of the TIM training program launched nationwide. Flexible delivery approaches allow trainers to customize the training for one or multiple disciplines or for a large or a small group. Trainers completing the Train-the-Trainer TIM program have provided overwhelmingly favorable responses, expressing much interest in promoting and recommending the training to others. Efforts are underway to encourage deployment of the TIM training program nationwide.

BENEFITS

- **Saving Lives.** Better training leads to faster incident response and clearance. This means fewer secondary crashes result from the original incident and less exposure to moving traffic while the incident is resolved.
- **Saving Money.** Efficient response also saves money. In Atlanta, improved incident clearance practices reduced secondary crashes by 69 percent in 12 months, saving lives and more than \$1 million.
- **Saving Time.** Well-trained responders can cut clearance time in half, decreasing delays caused by incident-related congestion. Train-the-trainer courses help responders learn more quickly.
